尊敬的阁下：

作为中美健康峰会组织执委会主席，我非常高兴地通知您：第四届中美健康峰会将于2014年10月16-18日在中国南京市举行。本届峰会的主题为“改革重构医疗体制，创新发展健康产业”。怀着恭敬的心情，我邀请您支持、参与本次峰会。

本届峰会得到中美健康卫生领域权威专家和领导的热情支持，国家卫生和计划生育委员会领导和美国健康与人类服务部官员将在大会上主题演讲或致辞。国际、国内政策制定者，知名专家学者，杰出产业代表将出席本次峰会。

中美健康峰会是中美健康领域领袖间的高端对话与交流平台，自2011年以来每年轮流在中美两国举办。大会力求专业、坦诚、平等、务实、高效。以往三界峰会已在中美两国乃至国际医疗健康界产生了广泛和深远的影响。

我们竭诚希望有更多的朋友与我们一道，推动制度改革和技术创新的融合，为人类的健康事业做出贡献。

期待您的光临！

马晶  
中美健康峰会组织执委会主席

Dear Guests:

As the President of the Organizing Committee for the U.S.- China Health Summit, I sincerely welcome all the participants to attend the 4<sup>th</sup> U.S.- China Health Summit!

Since 2011, the Summit has been held every year alternatively between China and the U.S. Over the past three years, the summit has received enthusiastic support from public health policy leaders, academic experts, and leaders from healthcare industries from both China and the United States. It has served as a high-level international platform for dialogue and exchange between the two countries. The Summit participants include international and domestic policy makers, renowned experts and scholars, and prominent industry representatives, ensuring that the exchange is equitable, pragmatic and efficient. Apparently, the past three summits have produced far-reaching impact in both countries in the all aspects of global health and healthcare reforms.

We hope that your support to and participation in the summit will help to form meaningful partnerships and network that will also help to promote healthcare reform and technological innovation in both countries.

MA Jing, M.D., Ph.D.

President, the Organizing Committee  
U.S.- China Health Summit

Dr. William Hsiao is K.T. Li Research Professor of Economics, Department of Health Policy and Management/Department of Global Health and Population of T.H. Chan School of Public Health, Harvard University.

Dr. Hsiao's health policy research program spans across developed and less developed nations. He and his research team focus their economic studies on five topics:

1. a simulation model of the US health sector;
2. payment systems for physicians and hospitals;
3. comparative health care systems;
4. financing health care in developing nations; and,
5. interaction between economic development and health care.

Two projects address policy issues of the United States. Hsiao and his colleagues developed a large scale simulation model that intends to assess the fiscal and health impacts produced by various national health insurance plans. Using time series/cross-sectional data, Hsiao's team designed a multi-equation model that employs a number of variables to predict utilization rates and prices of health services. This model also predicts total health expenditures from supply and demand variables, giving special attention to supply variables, such as physician and hospital beds per capita, availability of primary care physicians, and new technologies. The second project further expands his previous work on the resource-based relative value scale (RBRVS) by packaging physician services into episode of illness, and examines variation in resource input costs by quality of service.

Comparing health systems across industrialized nations, Hsiao applies political and economic theories to develop a structural framework of essential elements of health systems. His team uses econometric models to test various hypotheses and to estimate the extent to which each structural element influences health expenditures and health status. Employing his systemic framework, he is assisting Taiwan, Cyprus, Mexico, Colombia, China, and Sweden in their health systems reforms.

In developing nations, Hsiao's research focuses on the development of sustainable financing mechanisms to provide health care for the poor, rural population, and urban workers. With UNICEF's support, he collaborates with seven universities in China to conduct a nationwide study on health care financing and provision for 100 million poor Chinese. Meanwhile, with the support of The World Bank, he is launching a large scale social experiment on community financing for the rural Chinese population, involving 100 communities and two million people.

Paul F. Jacques, ScD, is the Director of the Nutritional Epidemiology Program and Senior Scientist at the Jean Mayer USDA Human Nutrition Research Center on Aging at Tufts University and Professor at the Gerald J. and Dorothy R. Friedman School of Nutrition Science and Policy at Tufts University. Since receiving his doctoral degree in Epidemiology from the Harvard School of Public Health more than 25 years ago, Dr. Jacques has applied his knowledge of epidemiology to the study of nutrition and aging. His research has examined the role of nutrition in age-related disorders such as atherosclerosis, diabetes, cataract, osteoarthritis and dementia. Dr. Jacques is the author of more than 250 original, peer-reviewed research articles and dozens of editorials, book chapters and reviews on nutrition and aging. He has extensive experience working with large cohorts and surveys including the Framingham Heart Study, the Family Heart Study, the National Health and Nutrition Examination Survey, and the Nutritional Status Survey of Boston-area Elderly. Dr. Jacques has also been involved in a number of randomized, placebo-controlled intervention studies examining metabolic and health consequences of altered nutritional status. Dr. Jacques' current research includes the examination of the role of diet on metabolic markers of diabetes and cardiovascular disease risk with an emphasis on whole grains, low fat dairy, flavonoids and overall diet quality; and the impact of FDA-mandated folic acid fortification of enriched cereal-grain products on folate status and health of Americans with an emphasis on the effect of high folate intake in the presence of low vitamin B12 status.

Linda P. Fried, MD, MPH

琳达·弗里德医学博士，公共医学硕士，在哥伦比亚大学梅尔曼公共卫生学院担任院长，哥伦比亚医学和外科医生学院担任教授，并在哥伦比亚医学中心担任资深副主席。该公共卫生学院是美国国立卫生研究院在公共卫生领域资助的前三所学校之一，并且是改变全世界超过100个国家的人民健康的国际领导者。

在弗里德院长的领导下，哥伦比亚公共卫生学院建立了全国第一个关于气候与健康的项目，这个跨学院的项目为预防性的商业案例提供了经济证据，开创了哥伦比亚老年研究中心，改变了哥伦比亚大学关于创造健康城市的观点。这一举动引起了美国公共教育界的创新，现在被世界其他公共卫生学院引用。弗里德博士誉为政策实践领域的世界级专家，每年受邀参加世界经济论坛。她的理念是幸福健康的童年到老年能推动成功社会的创建。

弗里德博士是流行病学，老年学和老年疾病学领域的国际知名科学家。她一直致力于老龄化健康科学研究，创造能造福各个年龄段的老齡化社会的平稳过渡。她领导了新医学症状-衰弱症的命名工作，并研究其起因和为优化老年人健康的预防策略。她是经验团队的联合设计者和创始人。这是一个以社区为单位的，老年志愿者团体，他们致力于帮助公立学校的学生，同时开展预防老年人衰弱，身体残疾和认知减退的活动。在2008年成为院长前，弗里德博士在约翰霍普金斯医疗机构担任老年医学和老年学健康中心的主管。

弗里德博士收获了诸多荣誉。其中，她于2014年被美国国会授予“在世的医学传奇”称号，并被易普森基金会颁发2012长寿奖。弗里德博士被选拔成为美国国家科学院和美国医师协会会员。她也是麦克阿瑟体系中老龄化社会和世界经济论坛理事会和他们的全球社会保障工作组的成员。

Linda P. Fried, MD, MPH, is Dean and DeLamar Professor of Public Health at the Columbia University Mailman School of Public Health and Professor of Medicine at Columbia's College of Physicians & Surgeons and Senior Vice President, Columbia University Medical Center.

The MSPH is one of the top 3 NIH funded schools of public health and is a global leader in transforming the health of populations in over 100 countries around the world.

Under Dean Fried's leadership, MSPH has built the nation's first programs on climate and health, a cross-school program that delivers economic evidence on the business case for prevention; has opened the Columbia Center for Aging, and has transformed Columbia University's vision on leadership for creating healthy cities. They have led the U.S. in innovations in public health education that now serve as a model for other schools of public health around the world. Dr. Fried is invited annually to participate in the World Economic Forum and is sought after as a world leading expert in policy and practice for creating successful societies through health and well-being from childhood to oldest age.

Dr. Fried is an internationally renowned scientist in the fields of epidemiology, gerontology and geriatrics who has dedicated her career to the science of healthy aging and creating the basis for a transition to an aging world that benefits all ages. She has led the scientific work to define the new medical syndrome of frailty and its causes and potential for prevention as keys to optimizing health for older adults. She is the co-designer and co-founder of Experience Corps, a community-based senior volunteer program that both supports success of public school children and is, simultaneously, an evidence-based health promotion program designed to prevent frailty, physical disability and cognitive decline among older adults. Prior to becoming Dean in 2008, Dr. Fried served as the Director of the Division of Geriatric Medicine and Gerontology and the Director of the Center on Aging and Health at The Johns Hopkins Medical Institutions.

Dr. Fried is the recipient of numerous awards. Among them, in 2004 a "Living Legend in Medicine" by the U.S. Congress and Fondation IPSEN's 2012 Longevity Prize. Dr. Fried is an elected member of the National Academy of Sciences' Institute of Medicine, as well as the Association of American Physicians. She is a member of the MacArthur Network on an Aging Society and the World Economic Forum's Council on An Aging Society and their Global Task Force on Social Protection.
